

AKK

AIR KOOLED EXHAUST

THE AK EXHAUST SYSTEM IS THE NEWEST, MOST TECHNOLOGICALLY ADVANCED DIESEL EXHAUST SYSTEM FROM DYNAFLEX, PROBABLY FROM ANYBODY. UTILIZING A PIPE INSIDE OF A PIPE DESIGN, AND AN EXTREMELY UNIQUE ACCELERATED AIRFLOW BAFFLING TECHNOLOGY, THE AK SYSTEM SUCKS AIR FROM THE BOTTOM OF THE ELBOW INTO THE AIR GAP BETWEEN THE PIPES, SPEEDS IT UP, SPINS IT AROUND, AND SENDS IT FLYING UP THE PIPE - KEEPING YOUR EXHAUST COOL TO THE TOUCH.

HANDMADE IN THE USA, PATENT PENDING - KEEP IT ORIGINAL, KEEP IT DYNAFLEX.

**DYNAFLEX
PRODUCTS**

EVEN IF YOUR DPF IS IN THE MIDDLE OF A REGENERATION, AND YOUR EXHAUST MIX IS UPWARDS OF 500°, THE SKIN TEMPS OF OUR AIR KOOLED SYSTEM RARELY EXCEED AMBIENT AIR TEMPERATURES. MEANING, YOU CAN DRIVE YOUR TRUCK HARD FOR 8 HOURS STRAIGHT, GET OUT, AND LITERALLY HUG YOUR PIPES (WHICH YOU'VE WANTED TO DO SINCE 1972)

PROVIDING ALL THE BENEFITS OF A HEAT SHIELD, ALL THE STYLE OF AN ORIGINAL MONSTER STACK SYSTEM.

WHETHER ORDERING OUR AK SYSTEM IN CHROME OR BLACK PAINT - THESE NEWLY DESIGNED BAFFLES KEEP THE INSIDE TUBE PERFECTLY CENTERED - MAKING INSTALLATION EASY AND PAINLESS.
